Use cases

[UCS-01] User signs in

User: not authenticated user.

Preconditions:

- user not authenticated;
- Form UI-01: Sign in form is shown.

Postconditions:

- User is authenticated;
- Form UI-02: Home page is shown.

Main flow:

1. The user specifies his credentials and signs into the system using UI-01/A01: Login.
2. The system checks user credentials.
3. The system authenticates the user.
4. The system shows the form UI-02: Home page and shows the message Successfull authentication.

Alternative flows:

2a. *If* credentials are wrong *then* the system stops the use case and shows the message Wrong credentials.
